

Assembly Instructions

1. Cut as one single piece on solid black line.
2. Lightly score foam on dotted lines.
3. Fold and glue grey shaded flaps together - bottom flaps to back flaps, then front flaps to back flaps
4. Attach a faster where marked (a handbag magnet is my favorite method.)
5. Attach Belt Loop at gradient strips. Size and placement of belt loop will vary greatly depending on your belt and how high you want the pouches to be. As is, the belt loop is good for a 1.5" to 1.75" wide belt.
